Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claim 5 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 1 and 5 are objected to because of the following informalities:

Claim 1, line 7, it is unclear what is meant by the phrase "interposelly arrayed".

Claim 5, it is unclear what is meant by the phrase "tail-like configuration". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Brusasco.

In regard to claim 1, Brusasco discloses a coupled circulation tube (see fig. 13) for a ball

Art Unit: 3679

screw unit being formed of two symmetrically coupled first and second half arcuate integral elbow tubes formed on the planar surface at one side of the ball screw bearing each circulation tube being jointed to two circulation holes; and

each of the two symmetrical half tubes being provided a plurality of recessed grooves 21 and flanges 20 arranged one after another along the longitudinal tube wall to couple the two half tubes together into a resultant U shaped arcuate elbow tube.

In regard to claims 2 and 3, the tube is formed of a rigid metallic material.

In regard to claim 4, the two half tubes are coupled with each other by a plurality of recessed grooves 21 and flanges 20.

In regard to claim 5, the arrayed recessed grooves 21 and flanges 20 are formed into a tail-like configuration (they are cylindrical like a tail).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujita, Namimatsu et al., Kyfes, Sheppard, Porowski et al., Walter, Detraz et al., Edwards, Galonska, Collett, Mitchell, Roberts and Schmidt all disclose similar coupled circulation tubes common in the art.
